EAGLE TREES

-A NOTE FROM THE FARM

Eagles Trees is a family farm nestled between Bellingham and the Mt Baker Wilderness—along the Nooksack River.

Our DEM PURE Certified cannabis is grown under the sun with regenerative - closed-loop practices, pure water and LOVE. Growing from seed, in harmony with nature, the plants are able to express their true potential and contain the terroir - or flavor - of the land.

REGENERATIVE FARMING

We love our land, our crew and our family. We feel so fortunate to work together to create pure cannabis with an extremely small footprint. Through Regenerative Farming techniques we foster fertility in the land in order to grow the best cannabis with pure water, sunshine and love.

We believe that cannabis grown by and with nature is inherently better than cannabis grown with lights, pesticides and salt fertilizer.

At Eagle Trees we make our own organic compost and tend to the soil health using probiotic inputs and a wide array of companion plants.

We are Dragonfly Earth Medicine Certified and make decisions based on how they influence the health and wellness of our land, our employees, our customers and the greater community. The idea is to create super healthy land and eco systems-- from the microbes in the soil all the way to bud on the shelf!

We NEVER use chemical fertilizers, pesticides, or fungicides. Just good vibes, great intentions and wonderful weed!
