NOTES FROM THE FARM..

Our Pursuit of Sustainability

At Deaux, we pride ourselves on our pesticide-free, Clean Green Certified cultivation practices. Our state-of-the-art indoor environment ensures optimal growing conditions, allowing us to adhere to the highest standards of cleanliness and precision. We embrace organic growing practices to deliver cannabis that is pure, potent, and sustainably produced.

Thoughtfully Selected Cultivars

With a remarkable library of genetics amassed over 45 accumulated years of searching, we are dedicated to preserving the rich diversity of cannabis. Our collection includes rare and thought to be extinct heirloom genetics, carefully crossed with the exquisite strains developed in the last decade. This blend of tradition and innovation enables us to offer uniquely designed cannabis highs.

Craftsmanship in Every Detail

Our plants are lovingly cared for from mother to clone, clone to vegetative, and finally in flower. Through a 3-week cold cure of the whole plant, we ensure that we are preserving every nuanced terpene. We hand-trim all our flowers to ensure every bud is gently shaped. As a single-source provider, we maintain control over every stage of development, ensuring that you only receive the effects we intend to deliver.

At Deaux our mission is to offer a premium product that reflects our dedication to excellence and our respect for the craft. Explore our offerings and experience the difference that passion and expertise can make.
